A Resolution is a legal document that expresses the general opinion of the committee. Once passed it can be seen as a list of actions that your committee recommends.

A resolution first starts as a **WORKING PAPER**
Once it is submitted to the Dais, it is a **DRAFT RESOLUTION**
Through a series of Moderated and Unmoderated Caucuses, it gets amended and adjusted.
Eventually, it is put to a vote.

Need a Title, Committee topic, and a list of Sponsors and Signatories.

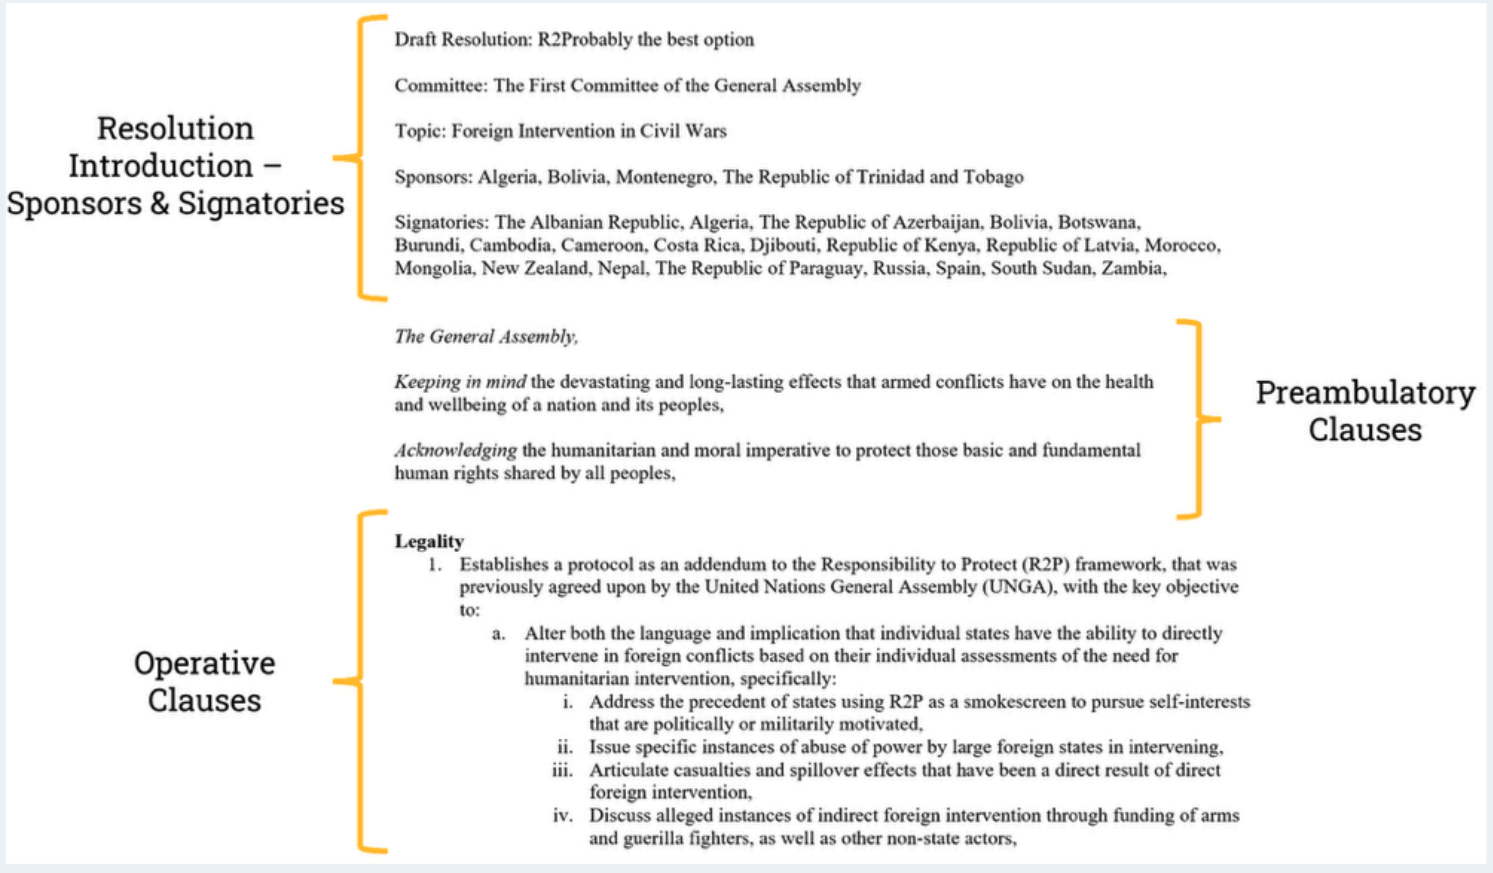

Sponsor: someone who made a significant contribution to the resolution writing process. They had some of the key ideas and worked with the other sponsors to create a resolution.

Signatories: people who may simply be supportive of your ideas or believe that a Resolution is significant enough to submit to the dais for debate.

- Getting Signatories for a Resolution is a rather straightforward process as most delegates will reciprocally sign each other's resolutions.
- It's important to remember that you can be a Signatory and still vote against a resolution.

Structure of Resolution:

1. Introduction
2. Preambulatory Clauses
3. Operative Clauses

A **Preambulatory Clause** is a precursor to the rest of your Resolution

- basically an acknowledgement of the problem that you are attempting to solve.
- Preambulatory Clauses highlight the magnitude of certain aspects of the issue that you will attempt to fix later on in your document.
- You can also use them to appeal to certain principles, define key terms or discuss the general scope of a topic that you are solving.
- All Preambulatory clauses end with a semicolon (;).

LIST OF PREAMBULATORY CLAUSES

Affirming

Approving

Bearing in mind

Deeply Convinced

Having considered

Recalling

An **Operative Clause** is your opportunity to showcase the solutions that you have created for your committee.

- Generally, writing these clauses should take up most of your time and make up most of your resolution.
- It's also important to make them as detailed as possible.
- Each Operative Clauses should end with a comma (,) the final clause should be punctuated with a full stop(.).

Operative Clauses -

6. Establishes the Intervention Action Criteria (IAC) that will give a definitive list of actions to be conducted by UN and regional bodies in civil conflict before the use of military force:
   a. The IAC should consider factors including but not limited to:
      i. percentage of lives lost within a country's population due to the consequences of civil conflict reaching great standards,
      ii. the dollar amount of property damage incurred,
      iii. effects of the civil conflict on surrounding countries
      iv. potential responses from actors involved and the consequences of an increasingly degenerating situation,
      v. The involvement required from outside actors to swiftly react, and stabilize the situation,
   b. The IAC will have a research branch that will reassess existing criteria every 2 years;

Operative Clauses can be used to create an entirely new initiative.

Make sure to be specific if you're going to make one!

Operative Clauses Cont'd -

30. Recommends evaluating the Kimberley Process Certification Scheme (KPCS) to address gaps, strengthen implementation, and restrict the funding of guerilla forces by nations that are involved in civil war by:
   a. Suspending nations from the KPCS that are in violation of the minimum requirements for the Scheme,
   b. Increasing prison sentences for smugglers and middlemen that introduce conflict diamonds to the international market,
   c. Enhancing the monitoring of the industry's compliance with KPCS by:
      i. Moving the diamond industry's self-regulation standard beyond voluntarism,
      ii. Encouraging governments to take responsibility for the monitoring of the diamond industry within their respective territories,
   d. Encouraging participating governments to provide professional support to the KPCS,

You can also try to improve existing organizations.

Just make sure you understand the fundamentals of how the organization functions.
